

## Montessori Training Programme

Dear parents,

Creating a creative learning space for your child plays as important a role as establishing their daily routine. Montessori, at home, is an effective method that aids you in guiding your child to make use of imagination to its utmost. We, at Mahatma, bring you the opportunity to become a Montessori parent with our Montessori Training Programme. A certificate, recognized by the National Council for Vocational and Research Training, will be provided on successful completion of the course.

### **As a parent, you will learn to**

- recognize and encourage your child's needs and interests.
- give your child a creative space while developing self-discipline and responsibility.
- identify your child's concentration and attention skills.
- create choices your child is comfortable with.
- encourage your child's efforts and dedication.

We recommend you go over the attached document for further details about the course. You can click on the provided link to register.
